

AllTheModium Ores Guide!

SiriusMC logo.png

Tiers of AllTheModium ores:

Netherite (Vanilla) → AllTheModium (ATM) → Vibranium (ATM) → Unobtainium (ATM)

Types of Ores

AllTheModium

AllTheModium.png

Typically, this ore can only be found within the Deep Dark biome located in the Overworld dimension, but due to the inclusion of the Aroma1997's Dimensional World modification, you can also find this ore within the Mining dimension. If you're looking in the Deep Dark, focus on the walls and roof within the caverns, or the Ancient Cities. If you're looking in the Mining dimension, focus on the Deepslate layer. Furthermore, to mine this ore will require Netherite quality tools or better.

In order to upgrade a tool or armor piece from Netherite quality to AllTheModium quality, you will need the AllTheModium Smithing Template. This template can be found by using a Brush on Suspicious Clay in Ancient Cities.

Vibranium

Vibranium.png

Vibranium ore can only be found within Crimson Forest and Warped Forest biomes of the Nether dimension. This ore only spawns at high Y altitudes, normally in the ceiling. To mine this ore will require AllTheModium quality tools or better.

To upgrade AllTheModium quality tools or armor to Vibranium will require the Vibranium Smithing Template. This template can be found using a Brush on Suspicious Soul Sand within Bastion Remnants located in the Nether.

Unobtainium

Unobtainium.png

Unobtainium ore can only be found within the Highlands biome within the End dimension. This ore spawns within the islands crust at any Y level. To mine this ore will require Vibranium quality tools or better.

To upgrade Vibranium quality tools or armor to Unobtainium will require the Unobtainium Smithing Template. This template can be found by looting chests within the Library of Dungeons in The Other dimension.

Other methods of obtaining these ores:

Method A:

Use of Laser Drills and Laser Bases from the Industrial Foregoing modification with the correct Laser Lens in the correct biomes can generate the respective ore for that biome.

Method B:

Use of Seeds from the Mystical Agriculture modification can produce Essence of these ores which can be converted into ingots.

Method C:

Use of bees from Productive Bees modification can produce combs of these ores which can be converted into ingots using a centrifuge.
