FAQ

> ### How do I start on the modpack?
>
> ATM generally always had some sort of quest progression which helped you advance through the game and begin with. ATM9 has a quest book which can be found on the top-left of the inventory. You will find a lot of rewards, tips & tricks and all kinds of guides on the core mods of this pack.

> ### How to install the modpack? How much RAM to allocate?
>
> Detailed instructions on how to install the modpack and allocate RAM memory can be found on this page: https://wiki.siriusmc.net/books/server-information/page/all-the-mods-9
>
> It is officially recommended to have between 8GB - 12GB of RAM allocated. More than 12GB of RAM allocated can cause issues.

> ### Why is flight disabled?
>
> Flight is disabled in certain dimensions (The Other, Blue Skies, and Twilight Forest), to add more difficulty towards progression.

> ### Why isn't mod <insert name> in ATM9 yet?
>
> ATM packs do not literally contain "All The Mods". Our main focus is having mods that are not buggy and don't ruin performance, or progression. If a mod supports Minecraft version **1.20.1**, and **Forge** (Not NeoForge), you may make a

> suggestion.

> **" Will <item> be banned?**
>
> Currently, the server will be launched in a beta phase. This means we will do gameplay optimizations as people join and notice issues. While we've already taken measures to mitigate massive landscape griefs or claim bypasses, such things might still happen, and staff might have to restore bases sometimes.
>
> If you notice items or mods causing dupe glitches, claim bypassing or are simply unbalanced, please create a ticket on our Discord server.
