

ATM9 (All The Mods 9)

image.png

ATM9 has over **400 mods** and countless quests and a built in proper endgame. Can you craft the **ATM Star**? Do you dare take on the **Gregstar**?

All the Mods started out as a private pack for just a few friends of mine that turned into something others wanted to play! It has all the basics that most other "big name" packs include but with a nice mix of some of newer or lesser-known mods as well.

In **All the Mods 9** we will continue the tradition adding many new mods while going for more stability.

Does "All the Mods" really contain **ALL THE MODS**? No, of course not.

ALWAYS REMEMBER TO BACKUP BEFORE UPDATING

Known issues

Potions are currently unusable in crafting, use automation to create the potions and anything using the potions, do not allow the potion into the players inventory. Waiting on GT to release the fix.

If you crash when turning on shaders just reload the pack and they will be on. First time opening your inventory it will lag slightly but only the first time.
