

Tekkit SMP

Designed as an upgraded edition of Tekkit 2, and a continuation of the classic Technic Pack SSP modpack from the earliest days of Technic, Tekkit SMP is a modpack that was originally meant to be, with a nostalgic host of both technical and magical mods at your disposal.

Tekkit SMP contains the full range of mods from Tekkit 2, plus the mods that were dropped in the transition from Technic SSP to Tekkit: mainly Thaumcraft, Mystcraft, and Mo' Creatures. The new Tekkit SMP expands on that with various carefully selected Thaumcraft and Mystcraft addons, alongside Mo' Creatures Extended, and smaller additions such as Re-Crystallized Wing. Electro-Magic Tools is another starring mod, being an addon to both Industrial Craft and Thaumcraft, combining the worlds of tech and magic.

Dynamite

Changelog

We will keep the changelog up to date as the modpack updates.

“

Version 1.0.5

Changes:

- Resolved the false-positive with the New Wonderology mod (the current Thaumic Wonders fork). For more information, see <https://github.com/xJon/Tekkit-SMP/issues/41>.
- Updated 8 mods in total, with some highlighted improvements being new Mystcraft integration with IC2 Classic, Railcraft sounds and whistles are back, and you can now select the Modern Beta Plus preset under Modern Beta to get all of the modern & modded biomes in a Beta terrain style!

This is posted by xJon on the official Tekkit SMP - Technic Launcher website

Downloading Tekkit SMP

Technic Launcher

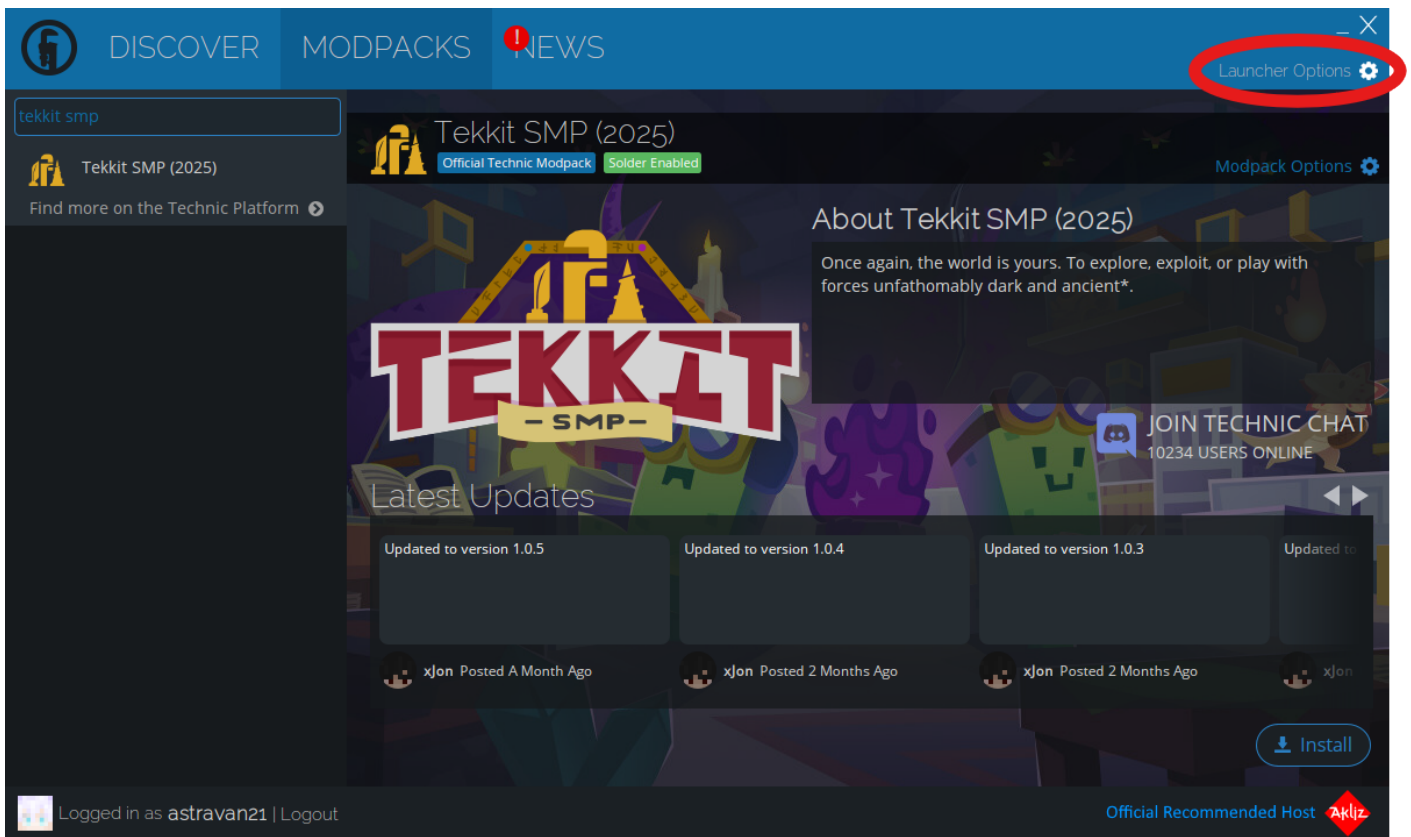

Enter "**Tekkit SMP**" into the search bar, the modpack will be the first one on the list.

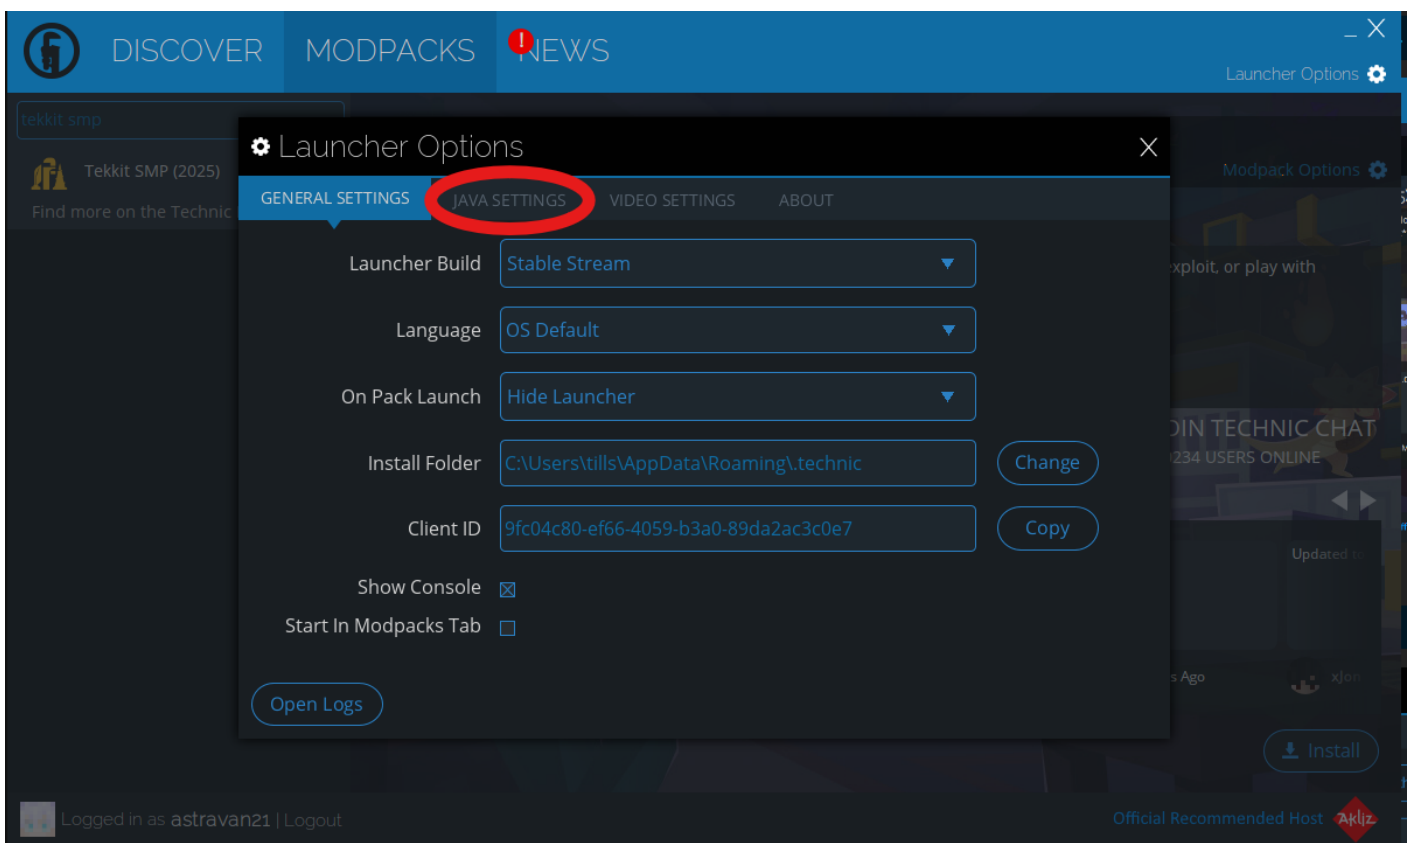

After selecting the modpack, venture down to the bottom right of the launcher and click **"Install"**.

After the modpack is installed, venture to the top right of the launcher and select **"Launcher Options"**.

Venture to the second setting and select "**Java Settings**".

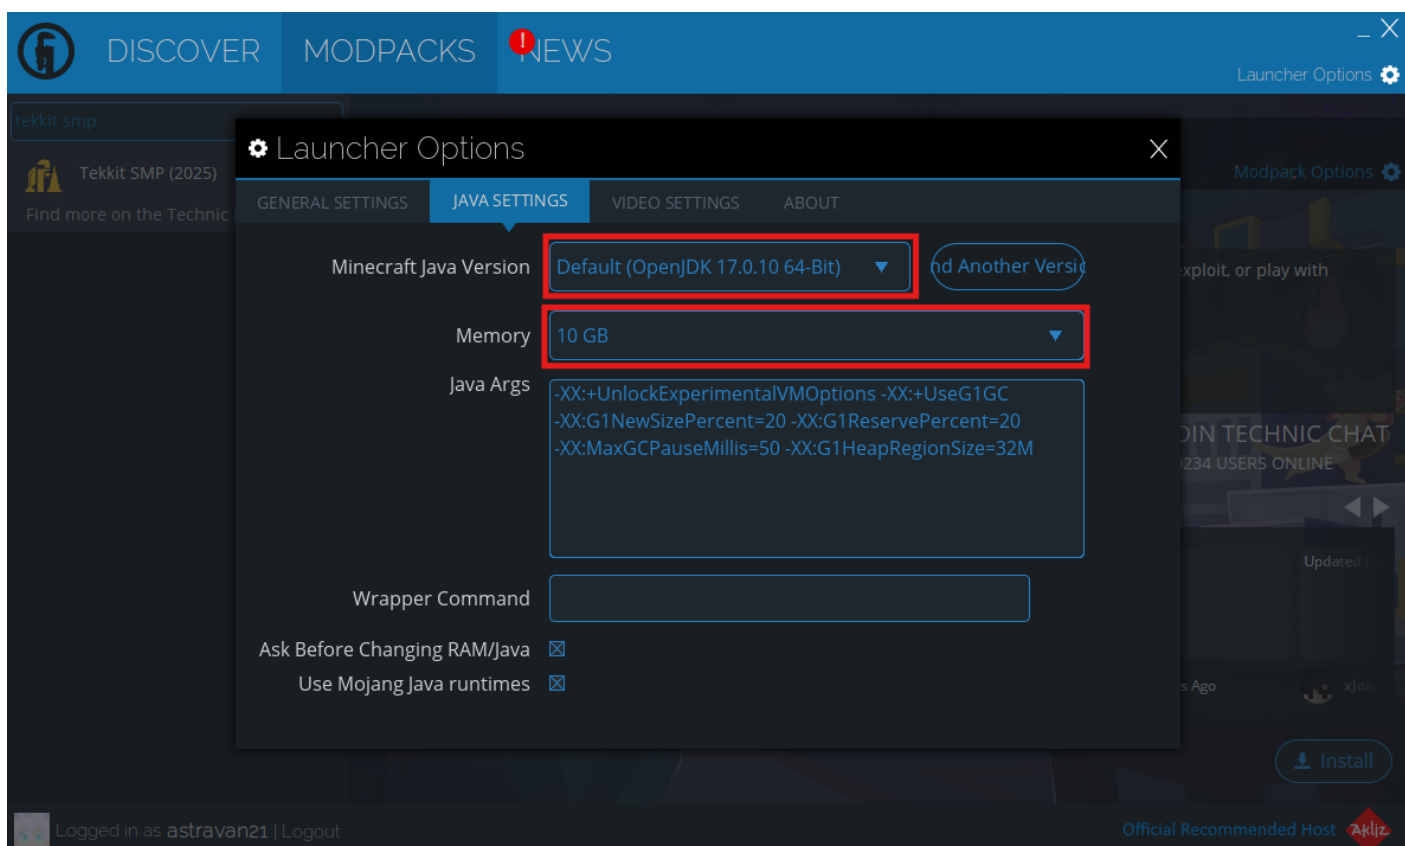

After you have selected Java settings select your choice of RAM.

Tip: If you have **16GB** or more use of RAM, (**8-12GB**) allocation of RAM will ensure a smoother gameplay.

Recommended RAM allocation: **Server Recommended (5-8GB)**.

You need a 64-bit Java environment!

You are good to go after all completed steps, please do enjoy the server!
