

The 1.12.2 Pack

THE 1.12.2 PACK PERFECTLY COMPLEX

The 1.12.2 Pack is a large modpack containing over 250+ Mods. It is a pack optimized for high performance, stability & a customized gameplay experience. Examples of included mods are Galacticraft, AE2, Thermal Expansion and Twilight Forest. SiriusMC aims to provide a stable and bug-free playing experience while providing the benefits of multiplayer play, such as a strong community and a strong but fair economy.

Quantum Quarry - Causes Excessive Lag

Machine Inventory Manager - Causes Excessive Lag

EFLN - Bypasses Claim Prevention

Changelog

We will keep the changelog up to date as the modpack updates.

Version 1.5.5

Big maintenance update, featuring many improvements, and among other things, waterlogged furniture!

Changes:

- SerializationIsBad was added, to patch a serious security vulnerability that is found in a few mods.
- Fluidlogged API was added, and properly configured. This backports the waterlogging ability to many pipes and other tile entities! Also added Snow! Real Magic!, which adds some snowlogging features and other snow related features.
- VintageFix was added, which improves the loading speed of the modpack dramatically (reduces it by 15-20%), and improves RAM usage. Also added Sledgehammer, which fixes various minor bugs, and Thaumic Fixes (which patches currently one Thaumcraft bug).
- Also added Deep Below (new underwater structure?), Modern Splash (new loading screen), Just Enough Recipe Integrations & IC2X UU-Matter (more in-game info), ICBM Classic: Computer Craft Addon, Advancement Locator, and ConfigAnytime. Make sure to learn more about all the new mods over the Mods tab!
- Removed FoamFix (replaced by VintageFix), Startup Timer (included in Modern Splash), SplashAnimation (currently incompatible with Modern Splash), DupeFix Project (now included in Universal Tweaks), Fast Leaf Decay (now included & improved in Universal Tweaks), Entity Desync Fix (now included & improved in Universal Tweaks), and Born in a Barn (included in Forge).
- A lot of small configuration changes, fixes, and improvements (including a new recipe for recycling Fragmented Carbon).
- Updated 38 mods to their latest versions, including a major update to ICBM (which breaks existing multiblocks - please note), and some new custom forks of mods. Some of the updates contain very useful bug fixes and improvements, including a fix to the issue of the game not responding when entering a world or a server.

Downloading The 1.12.2 Pack

Technic Launcher

Enter "**The 1.12.2 pack**" into the search bar, the modpack will be the first one on the list.

The screenshot shows the Technic Launcher interface. At the top, there are tabs for DISCOVER, MODPACKS, and NEWS. The MODPACKS tab is selected. Below the tabs, there is a search bar with the text "The 1.12.2 Pack" entered. The search results show a list of modpacks on the left, with "The 1.12.2 Pack" at the top. The main area displays the details for "The 1.12.2 Pack", including a "Soldier Enabled" badge, a description "About The 1.12.2 Pack", and statistics: 791 LIKES, 696K INSTALLS, and 3.8M RUNS. There is also a "JOIN VOICE CHAT" button with "2548 USERS ONLINE". Below the statistics, there is a "Latest Updates" section showing four updates, all to version 1.5.5, 1.5.4, 1.5.3, and 1.5.2, all posted by "xJon". At the bottom right, there is an "Install" button. The bottom status bar shows "Logged in as CipherOC | Logout" and "Official Recommended Host" with a red diamond icon.

After selecting the modpack, venture down to the bottom right of the launcher and click "**Install**".

The screenshot shows the Minecraft modpack launcher interface. At the top, there are tabs for 'DISCOVER', 'MODPACKS', and 'NEWS'. The 'MODPACKS' tab is selected. On the left, a sidebar lists various modpacks, with 'The 1.12.2 Pack' at the top. The main area displays the details for 'The 1.12.2 Pack', which is marked as 'Solder Enabled'. It features a large icon of a blue gem and the text 'THE 1.12.2 PACK PERFECTLY COMPLEX'. Below this, there's a section for 'Latest Updates' showing three updates: 'Updated to version 1.5.5', 'Updated to version 1.5.4', and 'Updated to version 1.5.3', all posted by 'xJon'. To the right of the updates, there are statistics: '791 LIKES', '696K INSTALLS', and '3.8M RUNS'. A 'JOIN VOICE CHAT' button indicates '2548 USERS ONLINE'. At the bottom right, there is a red 'Install' button. The bottom of the interface shows the user is logged in as 'CipherOC' and the modpack is an 'Official Recommended Host' by 'Akliz'.

Akliz

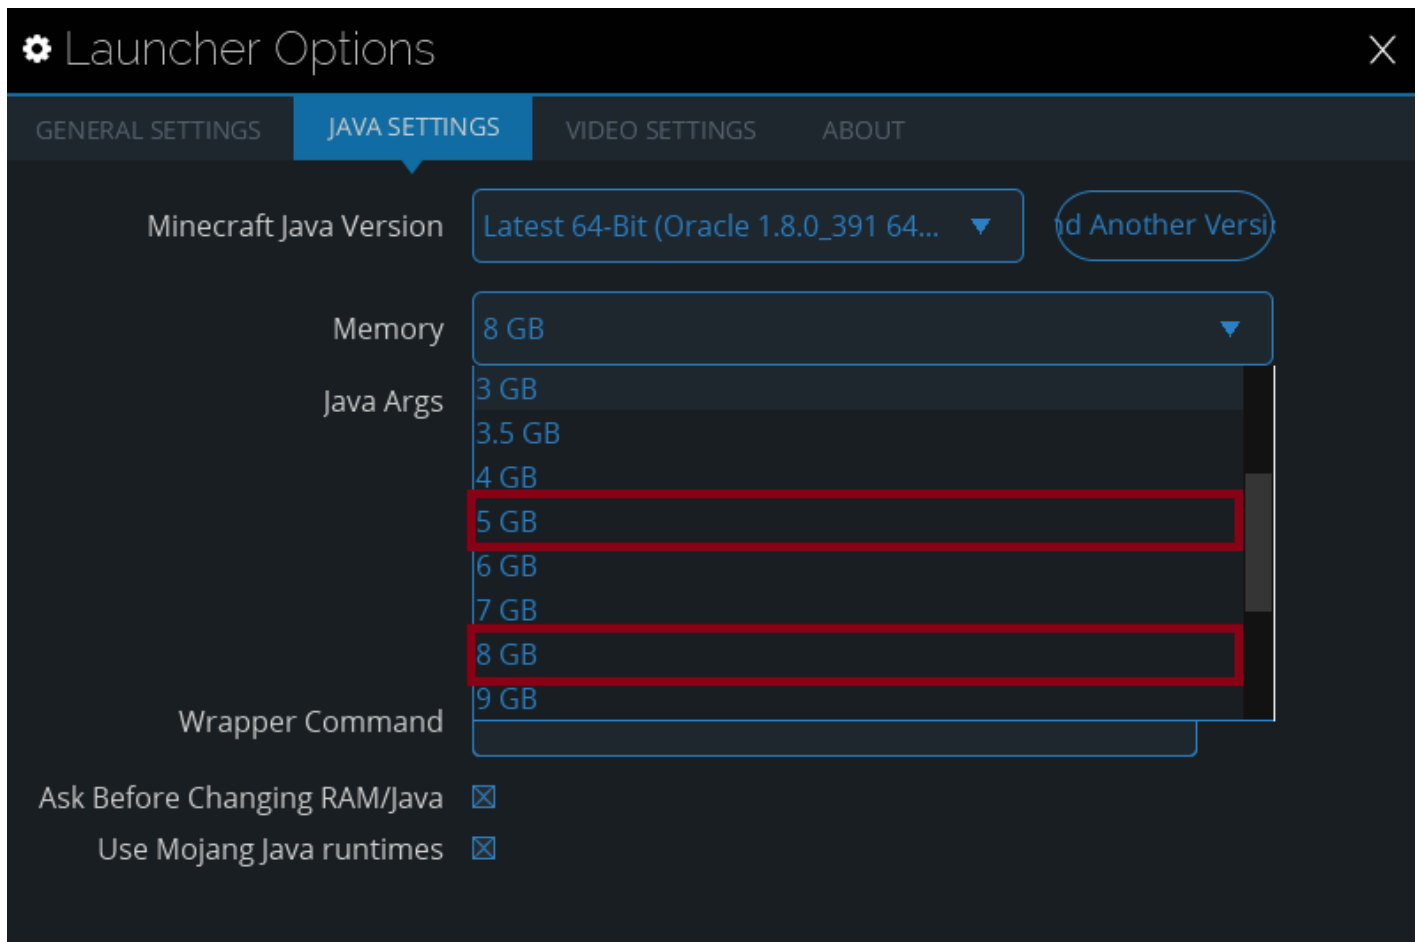

Venture to the second setting and select "**Java Settings**".

After you have selected Java settings select your choice of RAM.

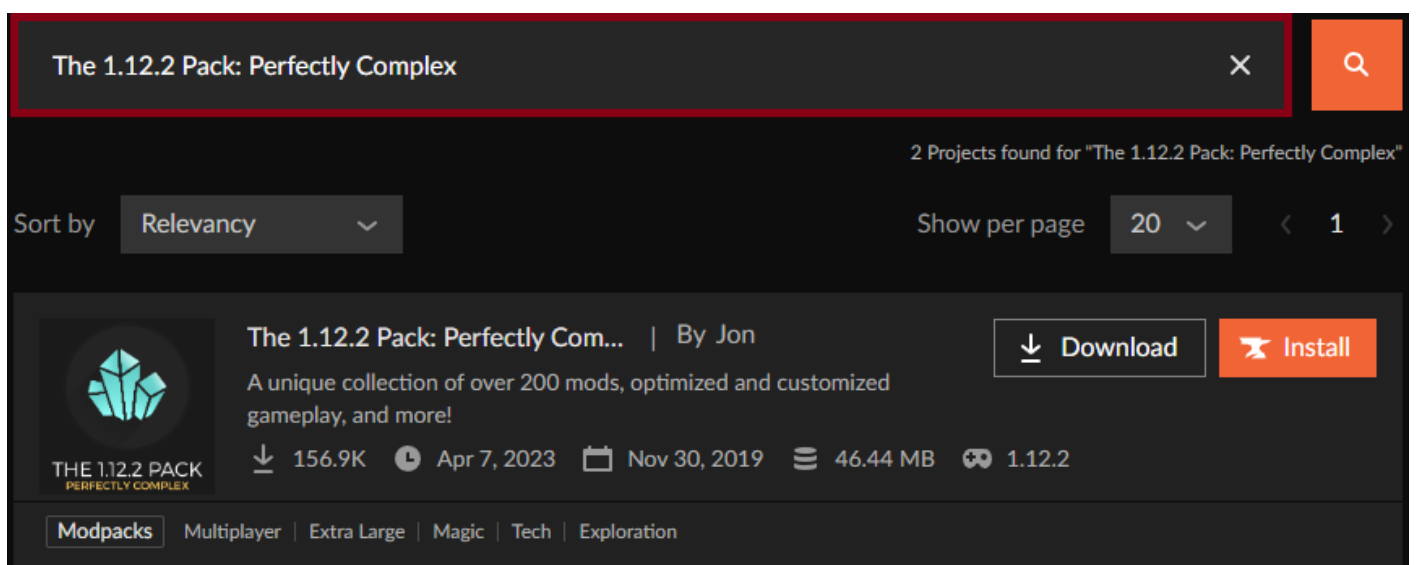

Tip: If you have **16GB** or more use of RAM, (**8-12GB**) allocation of RAM will ensure a smoother gameplay.

Recommended RAM allocation: **Server Recommended (5-8GB)**.

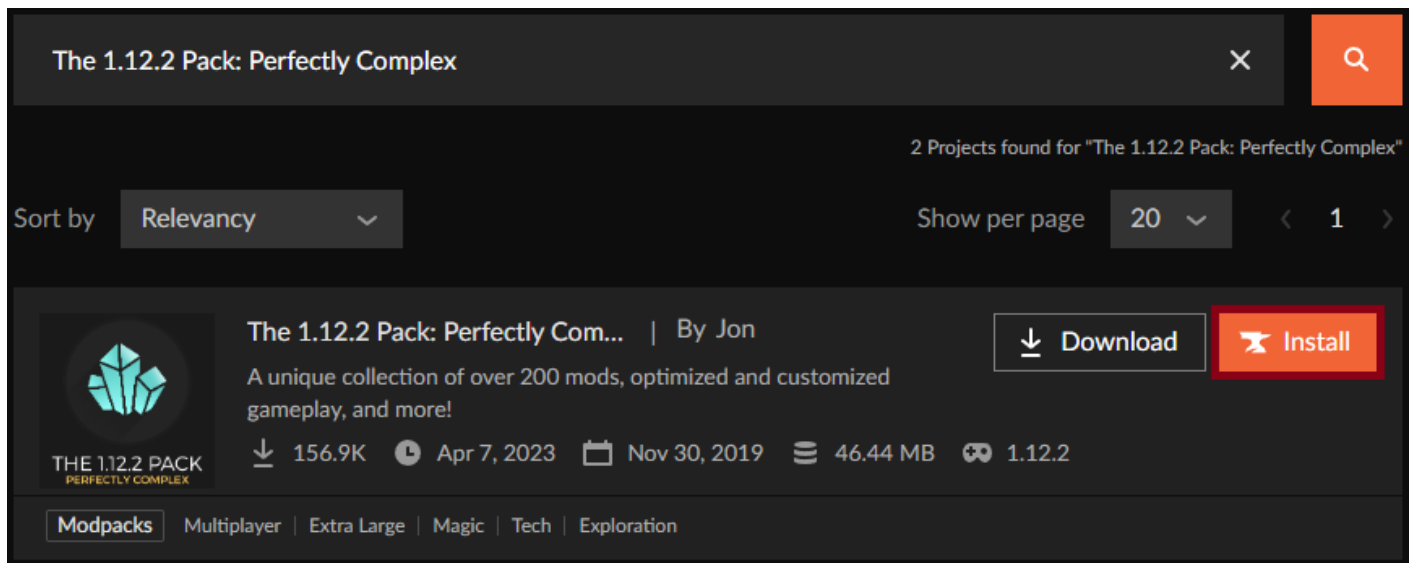

Curse Forge Launcher

Type into the search bar "**The 1.12.2 Pack**" and then enter.

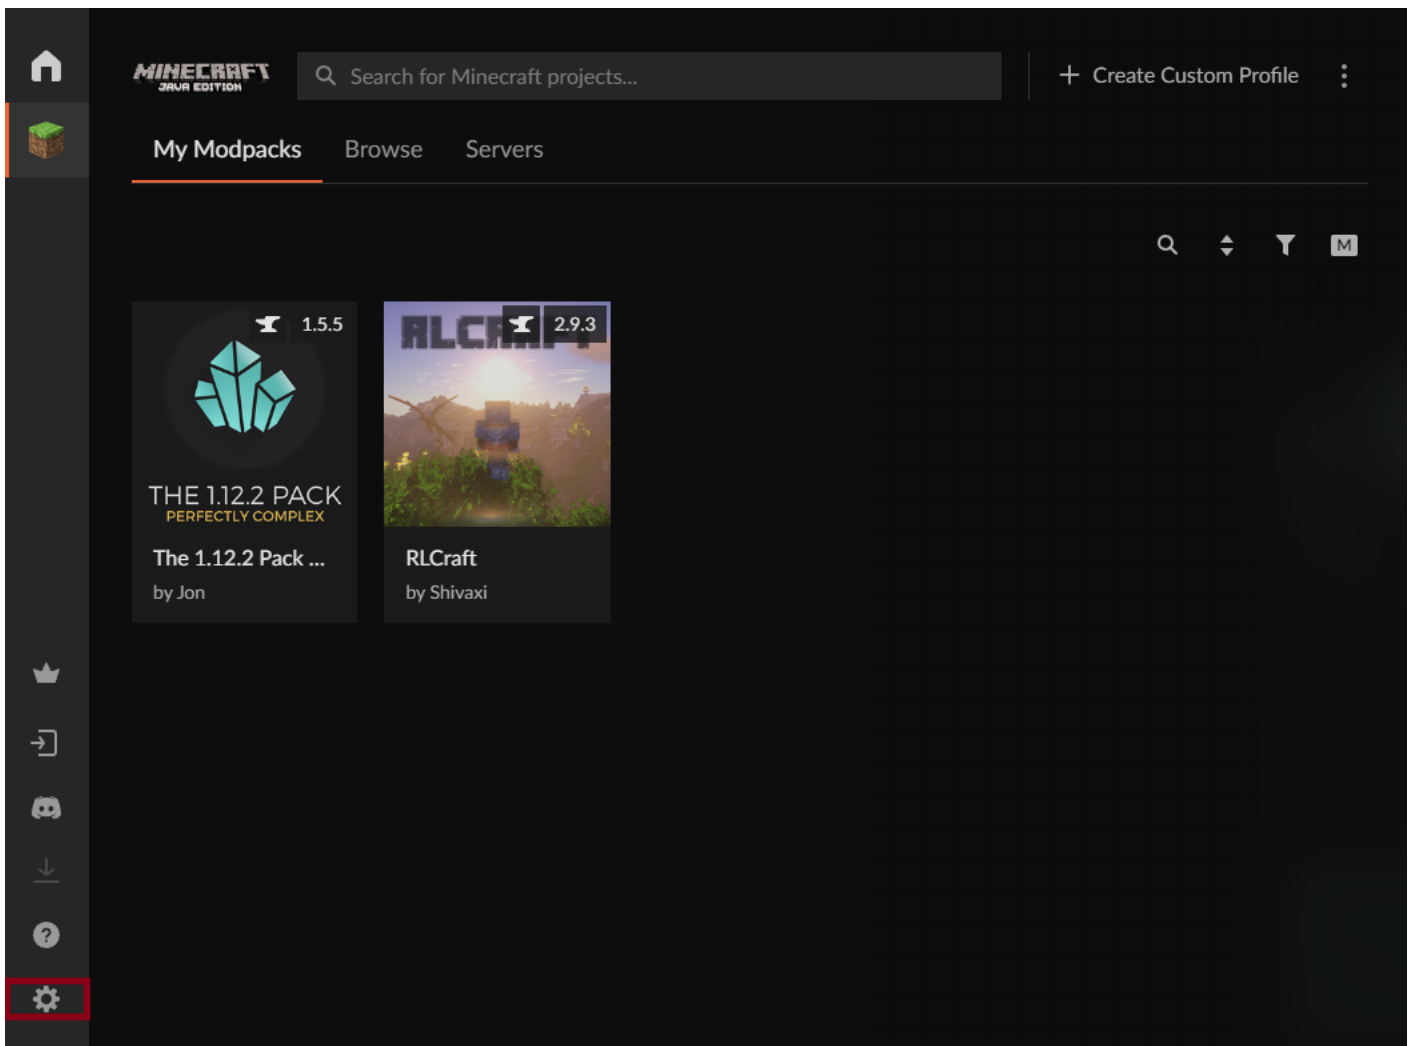

Hover over the modpack and select "**Install**".

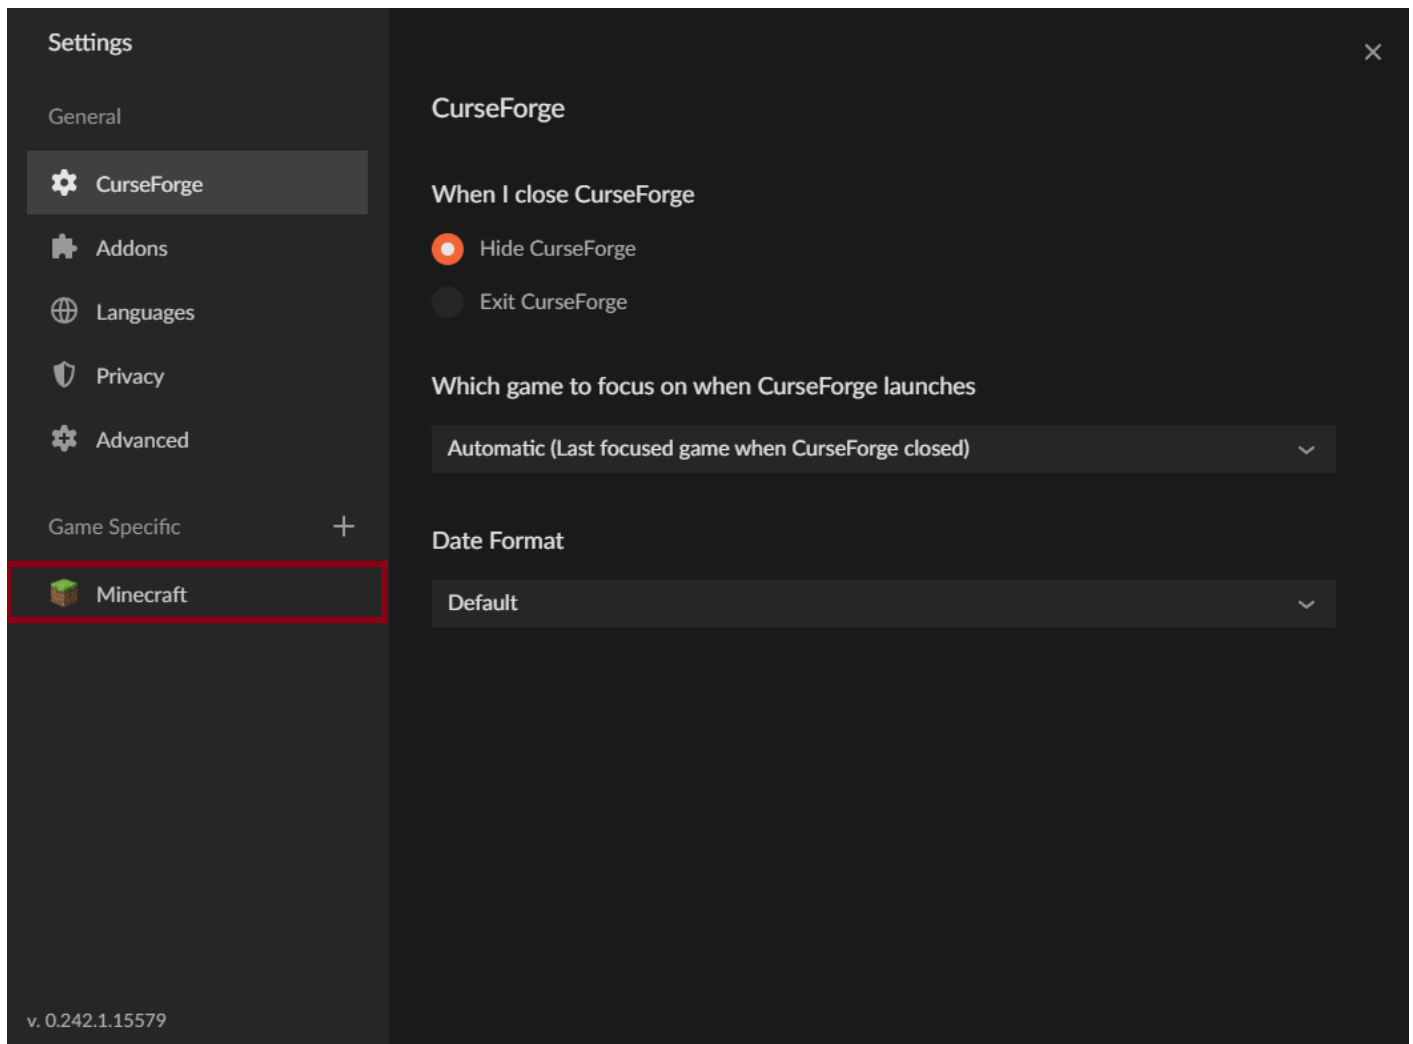

The screenshot shows the CurseForge interface for a modpack. At the top, the title "The 1.12.2 Pack: Perfectly Complex" is displayed with a close button (X) and a search icon (magnifying glass). Below the title, it says "2 Projects found for 'The 1.12.2 Pack: Perfectly Complex'". The "Sort by" dropdown is set to "Relevancy", and the "Show per page" dropdown is set to "20". The main content area shows the modpack details: a diamond icon, the title "The 1.12.2 Pack: Perfectly Com...", the author "By Jon", and a description "A unique collection of over 200 mods, optimized and customized gameplay, and more!". Below the description, it shows "156.9K" downloads, a clock icon, the date "Apr 7, 2023", a calendar icon, the date "Nov 30, 2019", a list icon, the size "46.44 MB", and the version "1.12.2". At the bottom, there are tags: "Modpacks", "Multiplayer", "Extra Large", "Magic", "Tech", and "Exploration". On the right side, there are two buttons: "Download" and "Install". The "Install" button is highlighted with a red border.

Go onto your curseforge launcher and select "**minecraft**", venture to the left bottom and select "**settings**".

After in the settings, select "***minecraft***".

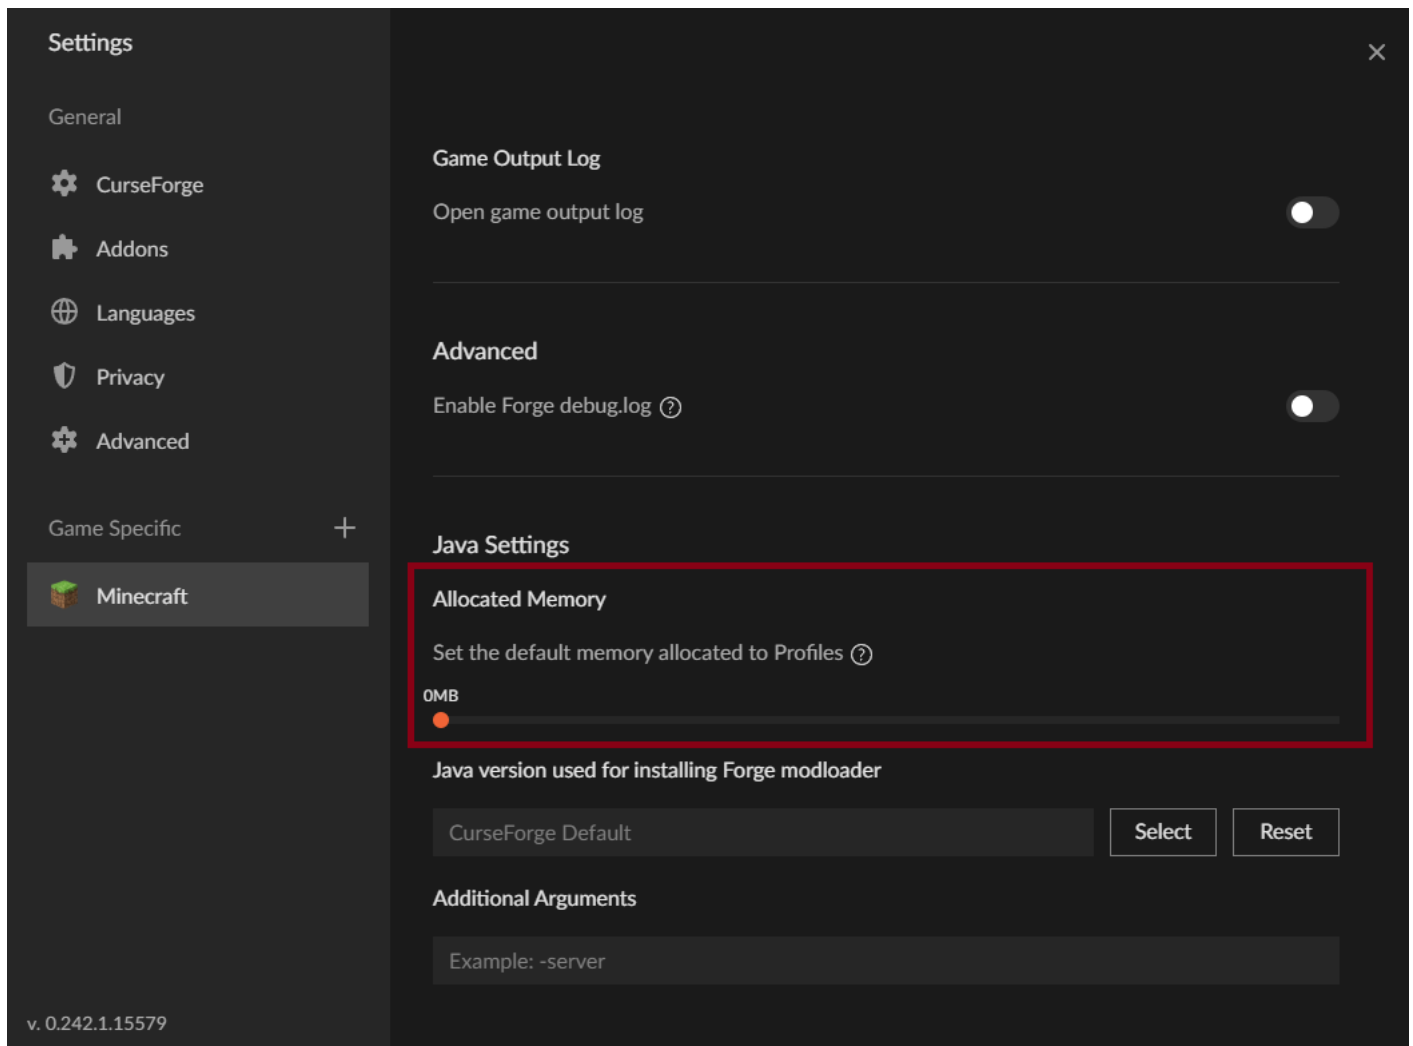

After minecraft is selected, select your choice of RAM.

Tip: If you have **16GB** or more use of RAM, (**8-12GB**) allocation of RAM will ensure a smoother gameplay.

Recommended RAM allocation: **Server Recommended (5-8GB)**.

You are good to go after all completed steps, please do enjoy the server!
