

Errors "Failed to login - null" or "Failed to login - invalid session" when joining a server

Issue Description

These errors mostly happen when there is a Microsoft account authentication issue on your launcher, whether it is Technic or CurseForge.

[Authentication error example 1](#)

[Authentication error example 2](#)

Solution(s)

1. Closing the game and launcher completely, logging out from the launcher, and relogging back in are the most common fixes.
2. If that still doesn't work, you can navigate to **%appdata%/roaming/.technic** and delete the **oauth** folder.

If this still doesn't resolve the issue, you can open a support ticket on our [Discord](#) server.
